

PDS of Sulphuric Acid 98%

PRODUCT DESCRIPTION

Sulfuric Acid is a highly corrosive and powerful acid known for its ability to dissolve a wide range of materials, including glass, metals, and synthetic rubbers. It breaks down these substances into ions—charged atoms or molecules—and simple molecules through a chemical reaction. Its strong reactivity makes it essential in various industrial applications but requires careful handling to prevent damage to materials and ensure safety.

DISCLAIMER

All sales by Q-Acids Co, or affiliates “seller”, are governed by the seller’s standard terms and conditions of sale, available upon request unless otherwise agreed in writing. While information and recommendations regarding product application and end use are provided in good faith based on current knowledge and experience, the seller makes no warranty, express or implied, regarding merchantability, fitness for a particular purpose, or liability arising from use. Customers must evaluate the suitability of the product for their intended application, ensure compliance with third-party proprietary rights, and refer to the most recent product Datasheet, available on our site or upon request, for accurate guidance.

APPLICATIONS

Sulfuric Acid is a key industrial chemical used in fertilizer production, petroleum refining, and chemical synthesis. It is essential for metal surface cleaning, battery manufacturing, and the production of various chemicals, pigments, and plastics. Also, it plays a role in water treatment and pH regulation.

AVAILABLE PACKAGING

- Bulk Road Tanker (25 MT)
- IBC Packing 1830 kg
- Drums 275 kg
- Jerry cans 35 kg
